LinkedIn: linkedin.com/in/naveen-kumar-m-36793a305

PROFESSIONAL SUMMARY

AI-driven Full Stack Developer and final-year Information Technology student interested in intelligent web applications, machine-learning solutions, and responsive digital experiences. Works with frontend technologies, Python, Flask, REST APIs, databases, and machine-learning concepts, with a focus on practical projects and continuous learning.

INTERNSHIP EXPERIENCE

Sparkout Tech Solutions — Python Intern | 4 months

Python and Backend Development

Cognifyz Technologies — Full Stack Intern | Duration not provided

Full Stack Development

Upskill Campus — Machine Learning Intern | Duration not provided

AI and Machine Learning

TECHNICAL SKILLS

Frontend & UI: HTML, CSS, JavaScript, React.js, Tailwind CSS, Responsive Design

Backend & APIs: Python, Flask, REST APIs, JWT Authentication

Databases: MySQL, SQLite

AI / ML: Machine Learning, CNN Models, Prediction Systems, Generative AI

Tools: Git, GitHub, VS Code, Postman

SELECTED PROJECTS

- **AIT Placement:** Placement-focused web application. Live: aitplacement.vercel.app
- **AI Crop Disease Prediction:** Agriculture-focused prediction project exploring machine learning and CNN concepts.
- **Agriflow:** Smart agriculture project concept.
- **Secure Task Flow:** Full-stack task and workflow management concept.
- **Real-Time Code Collaboration:** Developer-tool concept for collaborative coding.
- **AI Accessibility Assistant:** AI and accessibility-focused project concept.
- **Hospital Appointment Booking:** Healthcare booking interface concept.
- **Flower Prediction:** Machine-learning classification/prediction project.
- **TasteBite:** Food-ordering interface concept.

ACHIEVEMENTS & TRAINING

Reported milestones: SMARTATHON 2.0 finalist; GDG AI Hackathon finalist; ZENITH’25 finalist; DevForge selected; AI in Healthcare Hackathon participant.

Training / certifications listed: GUVI Flask; GUVI HTML & CSS; Pantech Full Stack Course; Generative AI Training; HP AI Certifications; Government IP Awareness; Data Structures & Algorithms Using C; Problem Solving and Python Programming. Verify certificates and status before formal submission.

RESEARCH & INTELLECTUAL PROPERTY

Reported patent contribution: “The Smart Harvest: India’s Leap Toward Intelligent Farming”, focused on AI, machine learning, IoT, and predictive analytics. Official application details and legal status were not provided and should be verified before publication.

Draft generated from the profile details supplied by Naveen. Verify all claims, dates, certification statuses, and project URLs before submitting this resume.
